

INFRASTRUCTURE COORDINATING COMMITTEE

review update

CRAIG SHEPHERD Department of Planning

ICC ROLE

The ICC is a statutory committee of the WAPC, established in 1995.

The *Planning and Development Act 2005* defines the role and function of the ICC as:

“to advise the Commission on planning for the provision of physical and community infrastructure throughout the State...”

Sch 2 Cl 6 (3)

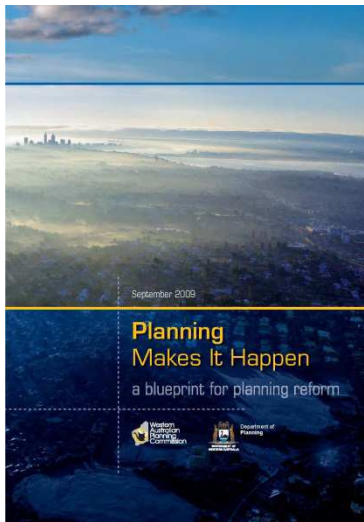

ICC REVIEW

INFRASTRUCTURE ISSUES – *What Stakeholders Say*

- Increased pressures on State infrastructure and finances
- Greater involvement of the private sector in public infrastructure delivery
- Lack of transparency around infrastructure delivery and decision making

ICC REVIEW

Planning Makes it Happen: A Blueprint for Planning Reform identifies the need for a review of the ICC's role and function with a view to improving its operation and strategic focus.

Strategic Priority 2.6 addresses the need to improve the effectiveness of the ICC in leading, coordinating and monitoring infrastructure planning and delivery.

Reform Project 3.13 details a specific review of the role, function, membership and status of the ICC

ICC REVIEW

INFRASTRUCTURE in WA

Some Stakeholders have called for an independent coordination body, similar to an **Infrastructure NSW** or **Infrastructure Victoria**.

The right model in the WA context....

ICC REVIEW

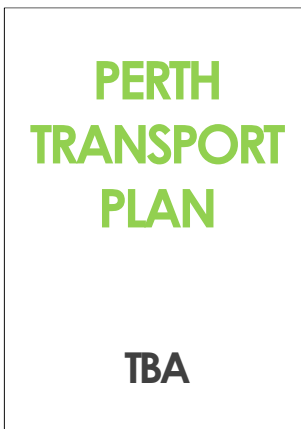

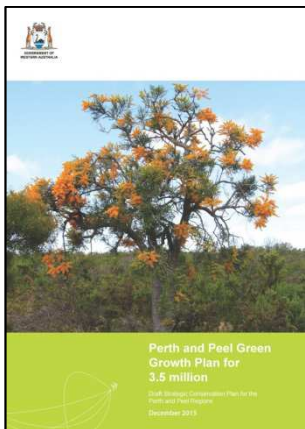

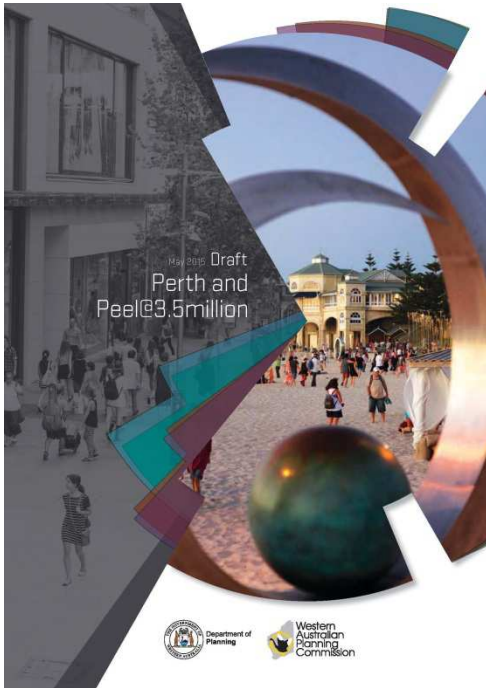

ICC ISSUES

- Large membership hampers effective and efficient integrated land use decision making
- Current structure does not encourage effective engagement and interaction between infrastructure agencies
- Limited integration with the broader infrastructure delivery processes
- Has not maximised its ability to support and inform decision making processes of the WAPC and government

Strategic Land and Infrastructure

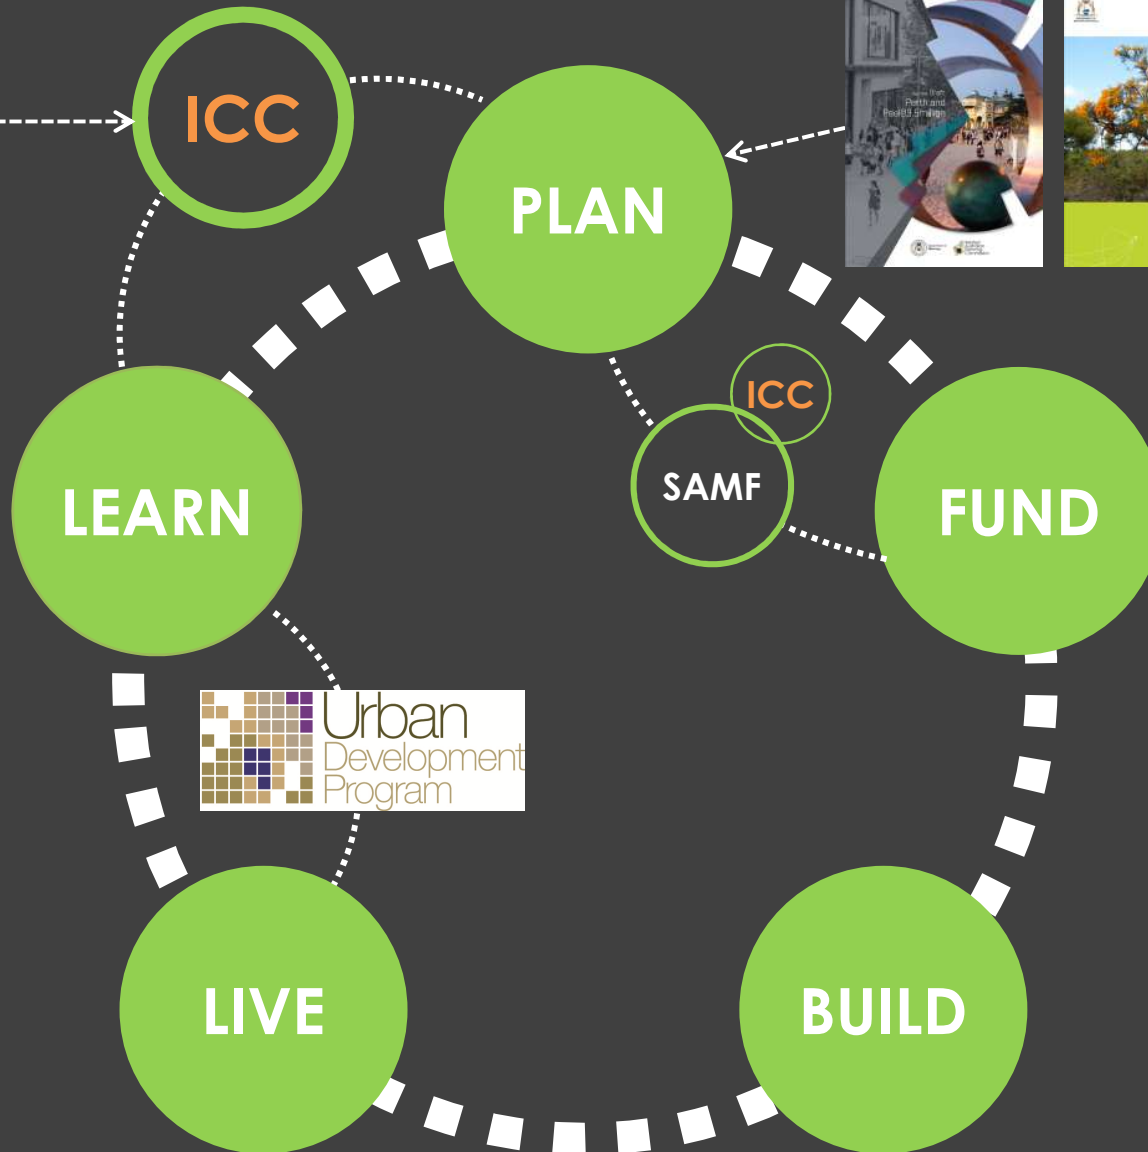

This review is timely:

With the release of *Perth and Peel @3.5million* and the Regional Planning and Infrastructure Frameworks, an opportunity exists to position the ICC as the **central body for coordinating the infrastructure needs highlighted in these strategic land use planning documents on behalf of the WAPC.**

INFRASTRUCTURE **PLANNING** CYCLE

Aligned
agency
network
plans

** Infrastructure Monitoring Framework

OBJECTIVES

Use **consistent** data to ensure aligned land use and infrastructure planning across government

Share information to **facilitate efficient** infrastructure provision and long term network planning

Promote the use of infrastructure as an **enabler** to meet strategic land use outcomes, supporting budget planning processes

ICC MEMBERSHIP

It is recognised that for a more effective ICC to be realised and in order for the ICC to provide the WAPC and government with effective advice, the membership of the ICC requires streamlining.

Two stage approach has been identified:

- 2016** WAPC sub-committee be established to act as a steering group to support the ICC
- 2017+** Legislative change to current ICC membership
